

# TVEMC Bib Log Viewer – Status Cards Guide

## Purpose

The Status Cards provide a real-time snapshot of runner flow and race health for the selected aid station. They help operators quickly understand who should arrive, who is currently present, and who is still on course.

## Expected Here (DB)

The total number of runners scheduled to pass this location based on official course and distance data. This number changes by aid station and represents the full expected population for that point on the course.

## Started (seen)

The number of runners that have been recorded anywhere in the system so far. This is an event-wide indicator that data is flowing and runners are being tracked.

## DNF

The total number of runners currently marked as Did Not Finish. This is an event-wide count and does not change by station.

## Outstanding @ This Station

Runners whose last recorded action at this station is IN. These runners are currently at the station or have not yet been checked out. Outstanding runners are expected during rest, sleep, or medical stops.

## Not Through This Station

Runners who are expected to pass this station but have not yet been recorded here. This typically means runners are still on course approaching the station. Use the Open List button to see who they are.

## Special Views

**START:** Displays DNS, DNF, and Not Finished. Primarily used by HQ or the Race Director.

**FINISH:** Displays Not Finished and a Last Known Location summary showing where remaining runners were last seen.

## Key Takeaway for Operators

Expected Here shows who should arrive. Outstanding shows who is currently present. Not Through shows who has not arrived yet. Open List provides transparency and confirmation — it does not indicate an error.

## 30-Second Operator Briefing Script

"At the top of the Bib Log Viewer are the green status cards. Expected Here shows how many runners are scheduled to pass this location. Started shows how many runners we've seen in the system so far. DNF shows how many runners are out of the race. Outstanding shows runners currently checked in at this station. Not

Through shows runners who have not arrived yet. Use Open List if you need details."
